ABOUT ME

I am a highly motivated and enthusiastic IT student with a strong academic background and a passion for technology. As a dedicated learner, I have consistently demonstrated outstanding performance in my studies and extracurricular projects. I am eager to apply my skills and knowledge in a dynamic and challenging internship program where I can contribute to innovative solutions and further develop my expertise.

EXPERIENCE

**The internship at Information Technology Department
Ayeyarwaddy Farmer Development Bank (A Bank)**

- Working with IT team.
- Develop softwares (Frontend Team), UI/UX (UI/UX Team)

**The internship at Information Technology Department
Dai-ichi life insurance**

- Working with IT app team with junior position.

Projects and Experience:

IOT project (Sole made) : As a leader in group, made the decision and developed the strategies for main idea of software.

Electronic Health Record : Developed the software for Hospital Records.

A Bank : Being an intern of UI/UX team, participated in the development of AMT's interface, A Talk logo and Visa Card. Developed the authentication by using firebase and E-commerce static website.

Dai-ichi, I guided the app team in frontend development while building a Call Management System using React.js and .NET, managing both the UI and development timeline—even as a junior.
